CRIPPLE CREEK MINERS WANT THE Developments in California Properties Mex-

jean Miners Are Now Treating Their Own Gren-A Cave in Idaho That Is Said to be Very Rich in Gold and Silver. DENTER, April 5.- During March Creede hipped 549 cars of ore, the output being mowhat reduced by the miners' troubles on the New York. The three big shippers will be running full blast again this week. ties gives indications of a lively camp next

summor. The King Solomon is pushing work

rigorously, and considerable talk is heard in The chief topic in Cripple Creek is the railroads. All the big properties are waiting for them before heavy shipments begin. President Johnson of the Florence and Cripple Creek line returned from New York last week. announcing the placing of \$1,000,000 bonds, and a final survey is now in progress. A large stamp and by the built in Florence by the time the railroad is speleted. The Victor mine is the best developes property in the camp. It has about 600 feet of laterals on the vain, and has produced \$80,000 in the development work. A well-defined vein from two to six liches has been traced, with a pay trax from three to twenty-four inches. Its deepest shaft is 200 feet, opening on a twooot vein. The company has so far paid a dividend while developing the property. The

eash. The Blue Bird is now patented. It has shipped regularly since December, the ore running from ten to twenty-five ounces in gold and from thirty-five to ninety in silver. This is the only property in the camp having silver.

transferred it to the Calumet Mining Company

in exchange for 600,000 shares of stock. The

Burns lode is very rich in gold, being on the shout twenty-five tons of smelting ore to Den-

The great mill of the French syndicate. built at a cost of \$50,000, will be in operation early in the present month.

In Leadville the Holden and Bimetallic

smelters are still adding to their capacity, and now they can treat 400 tons a day. Holden is working on the dumps of the l.a. Plata and Grant smelters of early days. Development work is in progress on a dozen old-time properties. Since smelting has been so the cost of treating ores has been greatly reduced. Mine owners have been than they formerly accepted, and fron carbonates are commanding a good price. Sulphide ores bring a fair price now, due to the reduc-In Aspen the Durant Compromise Company

has completed the track from the tunnel to the ore bins, and is now taking out an immense quantity of high-grade mineral. The Aspen, which uses the same tunnel is increasing its output. The Mollie Gibson has cently put in a monster pump weighing eighty tons, the high pressure cylinders being twenty-six inches and the low pressure fiftytwo inches in diameter. It has a capacity o 2,500 gallons per minute. The Gold Valley Placer Company on Four Mile Creek are at

A group of five claims near the famous Virginius at Ouray has been sold for \$45,000 to Pittsburgh men. The new company will run a crosscut tunnel to cut the Raleigh vein. Pueblo is excited over a reported find of re markably rich silves specimens near Beulah.

Duncan Camp, on the western border of San ils Valley, will be the principal new mining district to attract attention in Colorado mining circles. A large number of prospectors will go into the sparsely prospected district

will go into the sparsely prospected district of southwestern Wyoming this season and earefully examine that territory. Several experienced mining men of Denver will acquire considerable good property there this season. Contiguous to that territory are the Hahn's Pask gold placers in northwestern Colorado. Two companies have been doing some very expensive work taking out ditches and laying pipe ready to wash for gold at the rate of 2.000 to 3,000 cuble yards per day. A rield of at least 20 cents per cuble yard is anticipated. For a number of years a miner named Jacoby has been steadily opening a large block of ground in the Mascot mine on Griffith Mountain, above Georgetown. He now permits inspection of his years of toil. He has a voin of ore ranging from four to twelve inches in thickness that will return from eight to eighteen ounces of gold and some silver to the ton. He has paid his own expenses from the mine, and will now take out the ore in large quantities.

The mines about Silver Plume are working full forces of men. The Mendota shipped ilfteen cars during the past three weeks.

CALIFORNIA.

CALIFORNIA.

Ban Francisco, April 1.—In the Pioneer district, Amador county, there have lately been some new developements. The Zumalt mine was worked many years ago on the surface and was very rich. An effort was made then to find the ledge lower down by driving a tunnel, but without success. Henry Zumalt, the present owner, has found the ledge and has taken out ten tons of ore which netted, above the expenses of hauling and crushing, \$80 per ton. He estimates 100 tons in sight, all of equally good quality.

the expenses of hauling and crushing, SSO per ton. He estimates 100 tons in sight, all of equally good quality.

In Nevada county the North Star Mining Company paid last week a dividend of 50 cents par share. There are 100,000 shares in the mine. This dividend makes \$400,000 declared.

The Spangler brothers are making preparations for big work in their extensive placer mine at the mouth of Humbug Creek. They will open up the claim from Klamath River along the creek bed, and will put in a double cylinder, filteen horse power steam engine for removing boulders and holsting pay gravel into the sluices. H. J. Barton and P. C. Lange have made a very rich find of cinnabar on klamath filver, opposite the mouth of Horse Creek. It is on the claim known as the Mollie O'Leary mine, and the lode is believed to be very extensive. Archic Nichols has been taking out some exceedingly rich specimen quartz from his ledge proves to be permanent it will be a bonanza.

All the reports from the new Vanderbilt

All the reports from the new Vanderbilt mines in San Bernardino county indicate so rich a find that miners and prospectors are eager to get into that region as soon as possible. Hundreds of men have already gone there, and every one is predicting a population of 4,000 or 5,000 for the new camp in as many months. In two days last week \$1,400 was taken from the mines.

NEVADA.

Virginia Citt, April 1.—The Consolidated California and Virginia extracted from all parts of the mine during last week 611 cars of ore, about 455 tons: shipped to Morgan mill. 607 tons of ore; average assay value, per rail-road car samples, \$32.

The Ophir mine is sinking a winze, from which it extracted during the week 31 tons of ore, of which the average assay value was \$20 per ton. The bottom of the winze gives an assay value of about \$5 per ton.

WASHINGTON. NEVADA.

Assay value of about \$5 per ton.

WASHINGTON,

SPOKANE, April 1.—The Old Dominion mine has developed in the upper workings six feet of a vein of pure lead carbonates, which will run as high as \$500 in silver to the ton. The atrike is a well defined vein that gives no indication of running short in quantity. A large adultional force of men has been put on, and the output of ore almost doubled. The company has arranged for the expenditure of \$100,000 in development work on the property, in the eight years since it was discovered the Old Dominion has produced over \$2,000,000 of proclous metals.

BRITISH COLUMNIA.

BRITISH COLUMBIA. VANCOUVER, April 1.—The finds in the Slocan country are attracting prospectors and mining men in great numbers to that region. A big gold belt is there, as well as an extensive allyer and lead region. The ore is said to be very rich. John M. Burke, the leading mine owner of idahe, has secured several good mining interests in the district. He bonded one mine for \$20,000. The Canadian Pacific expects to run a line through the Slocan country heat summer.

NEW MEXICO.

SILVER CITY, April 4.—The Bremen mill here, which was leased by the owners of the Langston mine at Pinos Altos, has been closed down. The expense of hauling the ore from Pinos Altos to this place in addition to the cost of unining and milling is more than the ore will justify. It is reported that the nafrow-gauge railroad which is graded from this place to rines altos will soon be completed. As soon as this road commences operations the cost of transporting ore from Pinos Altos to the mills here will be reduced fully one-half. This reduction will enable some of the mines which are new idle to start up again.

Work has been resumed on the Montana tunnel of the Manhattan Gold Mining and Milling Company at Pinos Altos. The tunnel is already in about 700 feet, and the work will be completed by the lat of June if there are NEW MEXICO.

no further delays. The company is now paying \$18 a foot for driving the tynnel. The main voin on the property will be struck considerably below the deepest workings in any of the mines belonging to the company and thousands of tons of ore can be taken out above the tunnel level.

Honewell's new mill on the Animas, in Sieira county, has been completed and is ready to run on custom ores. There are quite a number of mines in the Animas district, which will furnish ore for this mill, which is the first one built in the district.

The production of smelting ores has failed off to such an extent in the Southwest that smelter managers cannot get ore enough to supply their smelters. Shipments from Mexico have steadily failed off, so that the supply derived from that quarter is but a small fraction of what it was two years ago. This is not due to any falling off in the production of the Mexican mines, but is owing to the fact that a number of large smelters have been erected in the mining districts of Mexico within that time, where a large smelter have been erected in the mining districts of Mexico within that time, where a large portion of the ore produced by mines which formerly shipped one to this country is treated.

Work was commenced last week on a large smelter at Magdalena, about eighty miles south of the Mexican boundary life, which will treat ore from the Magdalena, Monteyuma, and Ojo Caliente districts in the State of Chihuahua. Most of the smelters which have been erected in Mexico within the last two years have been built and are being operated by capital from this country.

The mines in the State of Chihuahua were never in a more prosperous condition than they are now. The Corralities Company, which

The mines in the State of Chihuahua were never in a more prosperous condition than they are now. The Corralitos Company, which operates mines at Corralitos 140 miles south of Deming, is making regular shipments of ore, and the mines show no signs of giving out. At Sabinal new discoveries have been made recently, and the shipments from that point are increasing. The great Santa Eulalia mines near the citr of Chinahua which have produced more than \$300,000,000 in sliver, are producing ore in large quantities, and a smelter is being creeted to treat the ore from these mines. This will be one of the largest smelters in the State. Shopherd's mines at Batopilas are producing very high-grade ore, and the output has been doubled within a few months.

months.

The duty imposed by this Government on argentiferous lead ores, which was intended to benefit lead miners here, has not only not had the desired effect, but it has resulted in increased smelting charges for the dry ores which are produced in New Mexico and Artzona because it raised the price of fluxing ore, which is produced in large quantities in Mexico, and which is necessary to use in connection with the ore produced here in the proceess of smelting. For a time the production of lead ore was stimulated on this side of the border and a large number of lead prospects were developed. Most of the ore bodies were found to be too small to work profitably, and there are but few lead mines being worked in this Territory now, and the smelter charges for reducing dry ores, which constitute the greater part of the smelting ore produced on this side of the border, are much higher than they were when Mexican ore was shipped to the smelters here in large quantities. These increased charges have caused the closing down of many mines which could have been operated if the smelting rate had not been advanced for the treatment of dry ores.

Operators of mines in Mexico found it impossible to ship ore to this country at a profit, and the gan to build smelters in Nexico. They found that ore could be treated there cheaper than it could be shipped here and treated, and the result has been that the mining industry has been stimulated in Mexico at the expense of ore producers here.

IDAHO CITY. March 31.—A few days ago a large chute of very rich ore was discovered in the Wolverine mine at Banner on the 600-foot level. This mine is the property of the Elmira Company. The discovery was not unexpected, as the chutes are very regular in the upper levels, and the one on the 600-foot level may be considered merely a cominuation. Miners are now at work extracting ore, and by the time the mill is ready to start the ore house will be full.

At Beaver district the Edna company are pushing the tunnel running to tap the Edna mine. When the roads are passable a mill will be shipped in. It is expected that other mines there will be worked extensively this year.

mines there will be worked extensively this year.

Mich is expected of Elk City, in Idaho county, this year. As the State is to construct a wagon road from that place to Mount Idaho, giving outside communication, arrangements are under way for five large quartz mills. The good effects of such laudable enterprise will be felt by our people before the close of the year. Besides the quartz mills, several placer companies, with sufficient capital to operate the mines, will go ahead with considerable push as soon as the season opens. Considerable abstantian or an of much prosperity is dawning. There are copper, lead, gold, and silver mines in that section. The gold mines will attract the most attention as the price of silver is so low that it is hard to interest capital in that class of mines.

The observments of Poles Besings methods.

f mines.
The placer miners of Bolse Basin are making

country, there is abundance of good ground left yet.

Mr. D. M. Steen has just made a sale of a group of twenty-five quartz claims in Prairie Basin. Lemhic county. The consideration was \$160,000. The deal includes the Yellow Jacket. Cleveland. Lincoln, and Continental groups. The new company has decided to construct a 20-stamp mill.

Considerable prospecting is now being done in Owyhee and Cafon countles, and the outlook for the early development of some good mines is very favorable. Many locations have been made along Snake River that prospect well. Be-ides the placers, a quartz ledge, carrying \$12 free gold per ton, has been discovered. The ore is sandstone, and very easily reduced. The mine is 22 feet wide, and extends along the river bluff for a distance of four miles. As water power is at hand the cost of reduction will be so small that it is believed that in a short time many stamps will be at

four miles. As water power is at name the cost of reduction will be so small that it is believed that in a short time many stamps will be at work reducing the ore.

The Black Jack mine, at Silver City, is yielding very rich ore. The highest grade, which is shipped, goes \$800 per ton, while the second grade, that will be milled there, will yield about \$150. The Black Jack is certainly one of the greatest mines of the State, and will add largely to Idaho's output this year. All of the other mines at Silver City are doing well, and several mills there will soon commence crushing.

The most important discovery of the year was made at Kendrick, in Latah county, a short time ago. While running a tunnel in the Sonoma a cave was reached at the distance from the face of 50 feet. The cave is 40 feet long, 20 high, and 20 wide. This tunnel is in the side of the mountain, some distance above Bowlder Creek. The mud bottom of the cave is a species of slack, decomposed mineral-bearing rock, mixed with carbonates. A pole was run down into the muck a distance of twelve feet, but how much deeper it goes has not yet been ascertained. Assays place the value of the ore at \$15,071 per ton, gold 729 ounces, silver 20 ounces, and lead 40 per cent. In the neighborhood of the Sonoma there are ten other mines that give promise of becoming fine properties with a little more development. It is now certain that Kendrick will become a great mining as well as agricultural district.

Work will be resumed on the mines at Willow Creek, five miles west of this place in part of the winter ore that milled from \$15 to \$25 in free gold was worked, but the roads closed and work had to be suspended until they are again thawed out.

ARIZONA.

ARIZONA.

ARIZONA.

TUCSON. March 31.—Prespecting below water level in Tombstone district is a new departure, and all predict a sensation in mining circles before sixty days roil by.

The big specimen for the World's Fair, which was taken out of the Copper Queen mine at Bi-bee was sent to Chicago some time and, and is now being dressed there. A car load of specimens was sent for the same purpose this week. In addition to this showing there will be two models representing the underground workings of the mine. This will be a novel sight. Every dip, spur and angle, shaft, winze, stope, and drift in this mammeth property will be repreduced. These models are about fix4 feet, and are made of small pieces of wood the size at a match.

L. Ephraim, owner of the famous Tuma-cacori mine in Promontorio district. Sonora, has at present sinety men employed. Those who have visited the property during progress of development say that it is gradually increasing in quantity and quality. Mr. Ephraim is preparing a shipment for El Paso. Messra. McGregor, Maloney, and Campbell have leased the Horn Silver mine at Eugene Camp, and are making big money out of the lease. There is at mesent swenty, five tons of high-grade or on the dump. The Kingman sampler is doing a rushing business these days. It is reported that John Smithline has discovered a valuable lodge of mineral above the Hainhow mine, and is taking out \$500 orc. On the Silver Hill mine, Chloride, seven or eight tons of ore are being extracted daily, and the mine is looking better with every shot put in.

Burgiars Feed on Chocolate Creams.

On Friday last an Italian opened a peanut stand on the corner of William and Frankfort streets. Yesterday afternoon the stand was osed and its owner absent. About 6 o'clock a delegation fifteen strong moved down from Cherry street on the peanut stand. Twelve o them were boys and three were girls, and none them were boys and three were girls, and none of them was more than 8 years old. When they reached the corner of Frankfort and William streets, sentinels were posted at Park row and Spruce street to look out for the coppers, while the rest of the gang pried and cut a hole in the top of the peanut stand. The hole was just big enough to pass a hand full of chocolate creams through, and every hand went in and came out full of chocolate creams. Soundings were about to be made in another part of the stand when the to clock policemen from Oak street came down four in a bunch, and the burglars fied. The policemen natiod up the hole in the stand. A Motion in the Minnesota Senate to Bogin

St. PAUL, April B .- Gov. Nelson went to the Capitol Friday night and signed the Peterson Paul to cost \$2,000,000.

The grain bill pessed the House late Friday afternoon, and the Governor's hasty action almost precipitated a riot in both Houses. It was openly charged resterday that corrupt means had been used to pass the Peterson bill, and that Gov. Nelson had held a possible veto of the Capitol bill over the heads of the St. Paul members in order to force them to vote for the grain bill.

The Governor's signing both bills at night and together increased the bitterness, and the storm broke resterday morning with great

and together increased the bitterness, and the storm broke resterday morning with great fury. In the Senate a move was made to secure the impeachment of Gov, Nelson.

Senator Leavitt moved an investigation of the Governor's haste in signing the Peterson bill. He made a sensation by charging that the bill had not even gone to the Enrolling Committee, Senator Grafe, the Chairman of that committee, being at his home at Willman. Senator McHale and Senator Hompe seconded the motion for an investigation in impassioned speeches, in which they said unworthy influences had been brought to bear to force the bill through the House.

Senator Homne said the Governor had forced certain members to vote for the bill upon the threat that he would veto the Capitol bill, and he hoped impeachment proceedings would be begun at the earliest possible moment.

Senator Leavitt's motion to investigate was, however, lost by a vote of 25 to 8.

The House also got into a row of pretentious proportions, with boodle as the central figure. The fight lasted an hour, and was precipitated on the motion of Representative Wilson to investigate the charges that to several members had been offered sums varying from \$1,000 to \$3,000 to vote against the Wyman Log Scaling bill. The motion was adorted by a vote of 77 to 3. The bill for the erection of a farmera elevator at Duluth, to cost \$200,000, passed the House and now goes to the Governor.

its literature to Christian workers, to ald in reaching the people with the Gospel. These grants are made through pastors, missionaries, Young Men's Christian Associations. Christian Endeavor Societies, King's Daughters, chaplains, voluntary lay workers, and others. There has been extended \$2,170,000 in this General number of the control of the cont

lacer. The expenditures in this department have exceeded \$712,000.

The report for the past year shows receipts from all sources in round numbers of \$375,-100. There have been employed 189 colporters, laboring in thirty-six States and Territories, who made 146,000 family visits, in over 100,000 of which they conducted religious exercises. They circulated 121,452 volumes, Theyfound about 12,000 families without any religious books except the Bible, and nearly 7,000 Protestant families without the Bible. They found over 28,000 professedly Protestant families without the Bible amilies who never attend church. They addressed 5,410 public religious meetings. The grants for the year amounted to about \$25,000.

Blahop Wigger Lays a Corner Stone,

ORANGE, April 9.-The corner stone of the new parochial school of St. John's Catholic Church, this city, was laid this afternoon by Bishop Wigger. Bishop B. J. McQuaid of Rochester delivered the sermon. He criticised the present public school system be-cause it excluded the teaching of religion. The Catholic societies of the Oranges, Mont-clair, and Bioomfield participated in a parade before the ceremony. The new building will be a handsome Homanesque structure, and will cost \$150,000.
